PROFESSIONAL SUMMARY

Senior Frontend Engineer with 10+ years of experience directing UI architecture and frontend infrastructure at scale for top-tier tech environments (Meta, Google). Specialized in GenAI integrations, LLM orchestration (RAG, agentic workflows), and designing high-performance streaming interfaces using React, Next.js, and TypeScript. Proven track record of architecting org-wide engineering standards, improving system latency by 30%+, mentoring senior talent, and delivering scalable enterprise applications serving billions of global users.

PROFESSIONAL EXPERIENCE

Blue Ocean Technology, LLC **Jan 2025 – Present**
Senior Frontend Engineer, AI & Infrastructure | Remote, USA

- Architected unified Next.js/React frontend infrastructure across 15+ concurrent enterprise mid-market applications, accelerating cross-team feature delivery speed by 40% while maintaining a 97% CSAT.
- Spearheaded the integration of Vercel AI SDK and LLM streaming into internal and client-facing dashboards, utilizing server-sent events (SSE) to reduce perceived AI response latency by over 50%.
- Directed the deprecation of legacy monolithic codebases, establishing a modular monorepo architecture with shared Tailwind CSS/Storybook component libraries, reducing new project onboarding time from weeks to days.
- Engineered Python-based automated CI/CD deployment pipelines, robust state-management patterns, and automated performance telemetry systems, recovering 600+ engineering hours annually.
- Defined and executed the long-term frontend technical strategy, aligning engineering initiatives with executive business goals to ensure scalability for projected 2x user growth and facilitating cross-departmental architectural reviews.
- Implemented comprehensive performance monitoring and error tracking using Datadog and Sentry, proactively identifying rendering bottlenecks to improve Core Web Vitals scores by an average of 15 points across key landing pages.

Wolf Carries **Mar 2019 – Dec 2024**
Lead Frontend Engineer | Cleveland, OH, USA

- Led a team of 8 engineers in rebuilding a Fortune 500 HR platform using React, TypeScript, and Supabase, increasing candidate application completion rates by 18% and overall user engagement by 25%.
- Designed and deployed a Python/Flask REST API to automate resume parsing and multi-modal candidate scoring, cutting manual recruiter review time by 40%.
- Architected scalable vendor management systems securely integrating Workday and Greenhouse ATS APIs, decreasing cross-platform data synchronization errors by 25%.
- Drove technical excellence across all client projects by standardizing state management (Redux Toolkit) and implementing strict React Testing Library workflows, reducing average sprint delivery cycles by 15%.

Aug 2016 – Feb 2019

Meta Platforms, Inc.
Senior Software Engineer (E5), Frontend Infrastructure | Menlo Park, CA, USA

- Orchestrated critical rendering path optimizations for Ads Manager (React/Redux), an interface processing $4B+ in annual ad spend. Reduced Time to Interactive (TTI) by 2.3 seconds on low-bandwidth networks.
- Pioneered a Python-based automated visual regression testing framework integrated directly into CI/CD pipelines, successfully blocking 95% of UI regressions from reaching production environments.
- Directed the migration of 9 legacy Webpack-based architectures to modern build tools (Vite), reducing average build times by 18% and significantly enhancing developer experience (DX) and hot-module replacement.
- Mentored 5 mid-level engineers, instituted rigorous code review governance, and defined Git workflows that lowered production bug rates by 30%.

Google LLC **Jun 2013 – Jul 2016**
Software Developer Intern | Mountain View, CA, USA

- Engineered real-time streaming UI components for AI-assisted writing models within Google Docs, achieving sub-200ms perceived latency for over 3 billion global users.
- Improved Lighthouse performance scores by 38% (68 to 94) by rebuilding and tree-shaking the shared React component library across 12 distinct Google Workspace product surfaces.
- Developed a Python/FastAPI telemetry pipeline processing large-scale user interaction data to fine-tune behavioral recommendation models, increasing AI feature engagement by 21% QoQ.
- Championed robust testing cultures, elevating unit test coverage from 52% to 89% and resolving 400+ WCAG 2.1 AA accessibility violations across core platforms.

SELECTED AI & SYSTEMS PROJECTS

Beam AI – Enterprise AI Agent Framework
Python, AWS, Redis, LLM Orchestration, SSO/MFA

Architected a SOC2-compliant enterprise-grade agentic framework enabling non-technical teams to compose auditable automated workflows integrated securely with CRMs and internal APIs, featuring granular per-agent credential scoping and real-time interactive traces of all LLM tool calls.

Butterflies AI – Generative Social Network Platform
Next.js, FastAPI, TypeScript, RAG, WebSockets

Sustained high-throughput AI character conversations and optimized real-time social feed rendering under peak load by engineering a generation pipeline fusing RAG, session memory stores, and safety guardrails into a highly-available FastAPI service and edge-cached Next.js routes.

Yolo Health - Digital Health Platform
React, Tailwind CSS, ShadcnUI, Node.js, Supabase, AWS

Delivered a full HIPAA-compliant digital health platform featuring adaptive clinical assessment flows and a personalization engine aggregating biometric data, utilizing React and AWS infrastructure to eliminate engineering dependencies for routine workflow changes while maintaining strict access controls.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript (ES6+), Python, HTML5, CSS3, SCSS
- **Frontend & UI:** React, Next.js, Redux Toolkit, Zustand, Tailwind CSS, ShadcnUI, Framer Motion, Storybook
- **AI & Machine Learning:** Vercel AI SDK, RAG Architecture, LLM Orchestration (LangChain, LlamaIndex), OpenAI / Anthropic APIs, AI Agent Frameworks, TensorFlow.js
- **Backend & Data:** Node.js, Express, FastAPI, REST APIs, GraphQL, WebSockets, Supabase, PostgreSQL, Redis
- **Infrastructure & DevOps:** AWS (S3, Lambda, CloudFront, EC2), Vercel, Docker, CI/CD, GitHub Actions, Vite, Webpack
- **Testing & Quality:** Jest, Cypress, React Testing Library, Playwright, WCAG 2.1 Accessibility

EDUCATION

Stanford University **Sep 2009 – May 2013**
Bachelor of Science in Computer Science | Stanford, CA
